There is an error in the **Funding** statement as published. The corrected statement can be seen below.

This project was funded by Innovate UK through the UK Government Sustainable Innovation Fund Small Business Research Initiative which ran from October to December 2020. Grant reference No. 76575. The researchers at the University of Strathclyde were sub-contracted by Seawater Solutions, a Glasgow based ecoservices company, to conduct research as part of a wider project on possible urban wetland demonstrators for carbon capture. The views expressed in this publication are those of the authors and not necessarily those of Innovate UK.

In the original article, there was also a mistake in the legend for **Figure 2** as published. The name of Seawater Solutions was missing. The correct legend appears below.

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Publisher's Note: All claims expressed in this article are solely those of the authors and do not necessarily represent those of their affiliated organizations, or those of the publisher, the editors and the reviewers.
