

National Lifecurve Survey: Service Type Checklist

Introduction

We are asking everyone to tell us which type of service they work in as part of the Survey. We have had a lot of feedback about what to include in this Checklist. Due to the large amount of data the Survey will generate we need to have a concise but representative list. Therefore we have grouped services together and have given examples of what is included in each group. **Please note that the examples are not an exhaustive list.** You **may not find** your exact service listed and are asking you to please choose the **BEST FIT** from the following list:

Service Type	Examples of what is included
Community Rehabilitation	Domiciliary, HSC Integrated Team, Reablement (including SW), Hospital at Home, Virtual Ward, Learning Disability,
